

The United States Pirate Party believes in freedom, fairness, and putting people before corporate and political interests. By ending failed policies and building real partnerships with our neighbors, we can make the USA safer, wealthier, and more secure.

FIX THE BORDER BY FIXING THE CAUSE

US meddling has fueled instability, forcing people to flee. More diplomacy and trade = fewer border crises.

HELP DOMESTIC BUSINESS

End pointless sanctions and open new trade opportunities that create jobs and lower costs.

REAL SECURITY, NOT EMPIRE BUILDING

Work with our neighbors to fight crime and corruption instead of creating enemies on our own continent.

PROTECT WATER, PROTECT THE USA

Clean water is a national security issue. Stop corporations from poisoning our rivers, lakes, and oceans.

RESPECT SOVEREIGNTY, EARN TRUST

No more election meddling. Let nations govern themselves. We expect countries to stay out of our elections, and we should do the same.

LEGAL, FAIR FREE MOVEMENT

More opportunities for legal work and travel = a stronger economy and fewer immigration crises.

LET'S INVEST BACK HOME

Stop wasting billions on foreign interventions and invest in jobs, infrastructure and healthcare at home.

Good Neighbors

Why the United States should practice being a good neighbor and why it benefits you

Imagine, if you will, the United States as a pushy homeowner who thinks they own the whole neighborhood. Instead of respecting their neighbors' property and choices, they barge in uninvited, tell others how to run their homes, and even break things when they don't get their way.

That has been the United States of America's relationship with the rest of the American continent.

This kind of behavior doesn't build trust. It creates resentment, conflict and instability, and just like in a real neighborhood, when relationships break down, everyone suffers including us.

The United States Pirate Party believes it is time to be a better neighbor. Instead of acting like the boss of the block, we should focus on mutual respect, fair trade and cooperation.

A strong neighborhood makes every home safer and more prosperous. If we want to make the USA stronger, we need to stop acting like a bully and start working as a partner.

**So how has the US foreign
policy in the Americas affected
you?**

IT HAS CREATED THE BORDER CRISIS

Decades of intervention has fueled our poverty, violence, and instability forcing millions to flee their homes. Instead of fixing the root causes, we waste billions on border militarization the doesn't work.

IT HAS DAMAGED OUR ECONOMY

The US has cut itself off from valuable trade and business opportunities in Latin America by enforcing pointless sanction and embargoes. Instead of helping US farmers, workers, and business, our policies make it harder to succeed in a global economy.

IT HAS WASTED OUR TAX DOLLARS

Instead of investing in domestic infrastructure, small business and families, our government pours billions into failed military interventions and economic warfare that benefit defense contractors, not ordinary citizens.

IT HAS POISONED OUR WATERS

SCOTUS recently ruled that corporations can dump sewage into American waterways without federal limits. This isn't just an environmental issue; it's a national security and health crisis. Water connects all of the Americas, and country that cannot protect its water cannot call itself strong.

IT HAS MADE THE USA LESS SAFE

Meddling in Latin American politics has damaged our reputation and made other nations less willing to cooperate with us on issues like crime, border security and trade. When the US government treats its neighbors like adversaries, it creates more adversaries.
